

US Quarterly Earnings Data 2019–2026: 7.6k Stocks: findings, method and data card

Fliar Research · released October 2026 · licence CC BY-NC 4.0

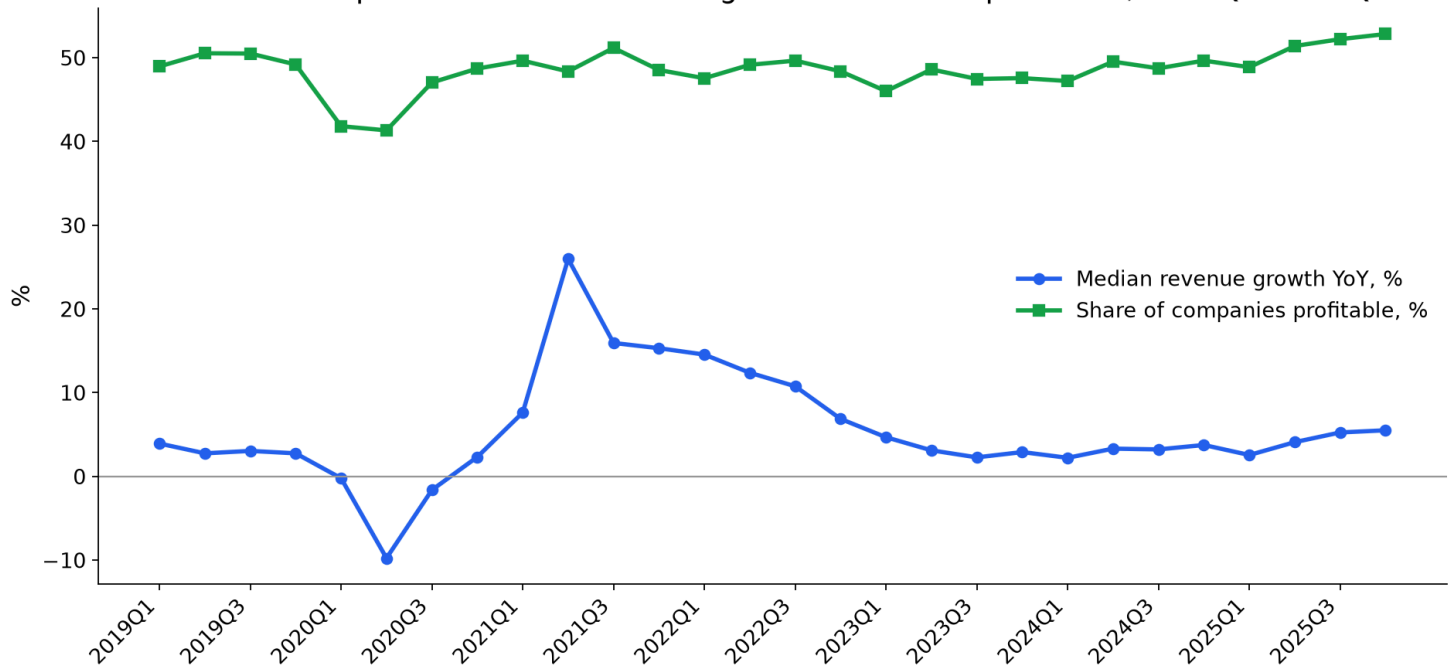

How this dataset was acquired. Every row comes from the [Radar API](#), Fliar's company-data API and MCP server. Radar collects the structured (XBRL) quarterly reports (form 10-Q) and annual reports (form 10-K) that US listed companies file with the US securities regulator, maps each reported line to a common set of metrics, and keeps one row per company and fiscal quarter. This release covers quarters ending January 2019 to June 2026 with three headline lines (revenue, net income and operating income, in US\$) and year-on-year growth computed against the same fiscal quarter a year earlier. Q4 is not filed on its own, so it is derived as the annual figure minus the nine-month year-to-date when both cover the same fiscal year. Each company carries its ticker, SIC sector and, where Radar can match it, its website. The full statements (cost lines, EPS, cash flow, balance sheet) for every quarter are available through `POST /v1/companies/financials` ([reference](#)) or the `get_financials` MCP tool.

This file is a 25% sample: 34,093 of 136,343 company-quarters. It keeps every record for a fixed subset of companies. The subset is chosen by a hash, so it stays the same from one release to the next. The findings and tables below were computed on the **full** data. For the rest, the withheld fields and monthly updates, [get a Radar API key \(docs\)](#). Each row's `fliar_profile_url` opens the company's full profile on Fliar.

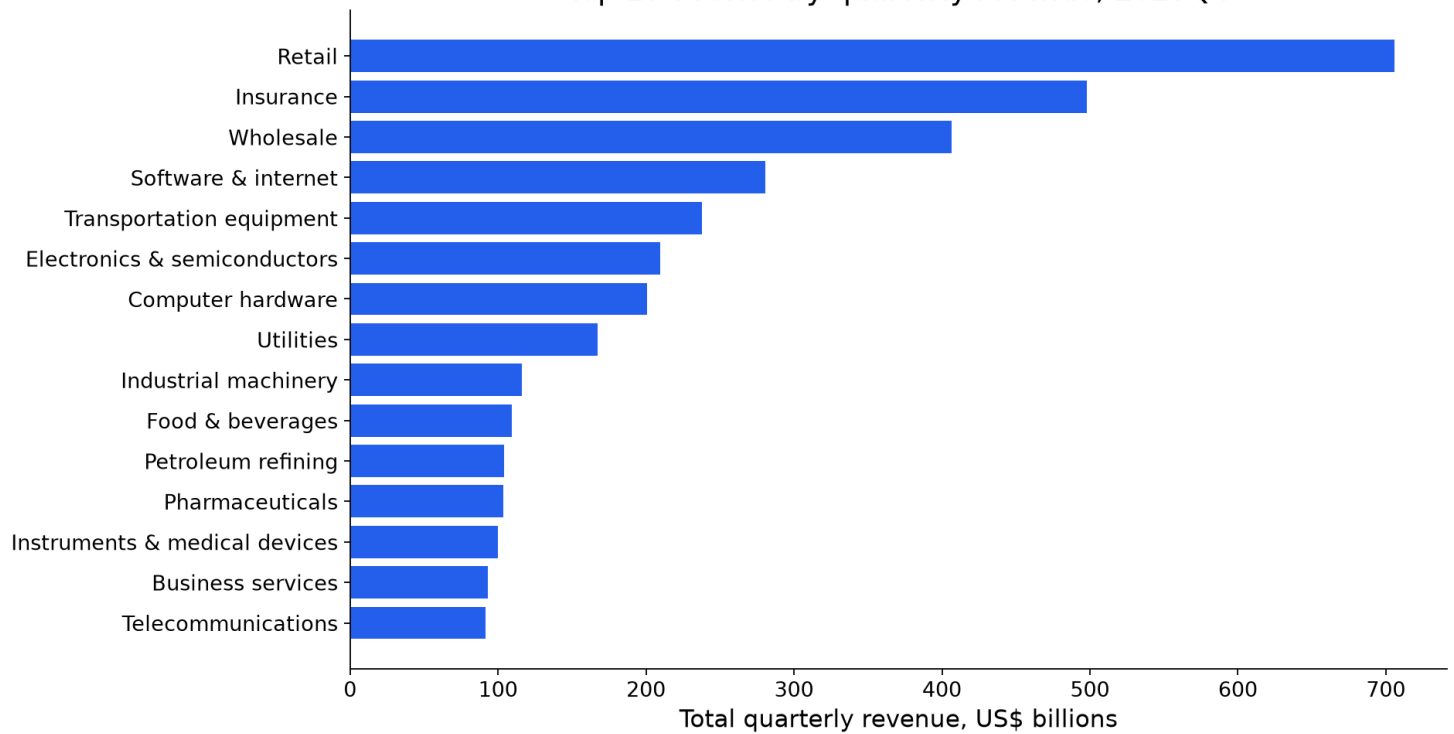

Key findings

1. **136,343 company-quarters for 7,615 US-listed companies, quarters ending January 2019 to June 2026.** 95,101 rows carry revenue, 129,387 net income and 108,494 operating income.
2. **Latest full quarter (2025Q4):** 4,192 companies reported a combined \$4.7T of revenue and \$495.9B of net income. AMAZON COM INC had the largest revenue (\$213.4B), Apple Inc. the largest profit (\$42.1B).
3. **Most filers lose money:** only 52.8% of companies with a net-income line were profitable in 2025Q4, against 79.5% of the 624 companies with at least \$1B of quarterly revenue.
4. **Concentration:** the 50 largest companies by revenue took 48.7% of all revenue reported for 2025Q4, and the 50 most profitable earned 56.9% of all profits.
5. **Growth:** the median company grew revenue 5.5% year on year in 2025Q4 (companies with at least \$1M of revenue a year earlier); the median was 26.0% in the 2021Q2 rebound and -9.8% in 2020Q2.
6. **Coverage over time:** 5,376 companies at the peak (2022Q1) and 4,192 in 2025Q4; 31,683 Q4 rows are derived from the annual report minus nine months.

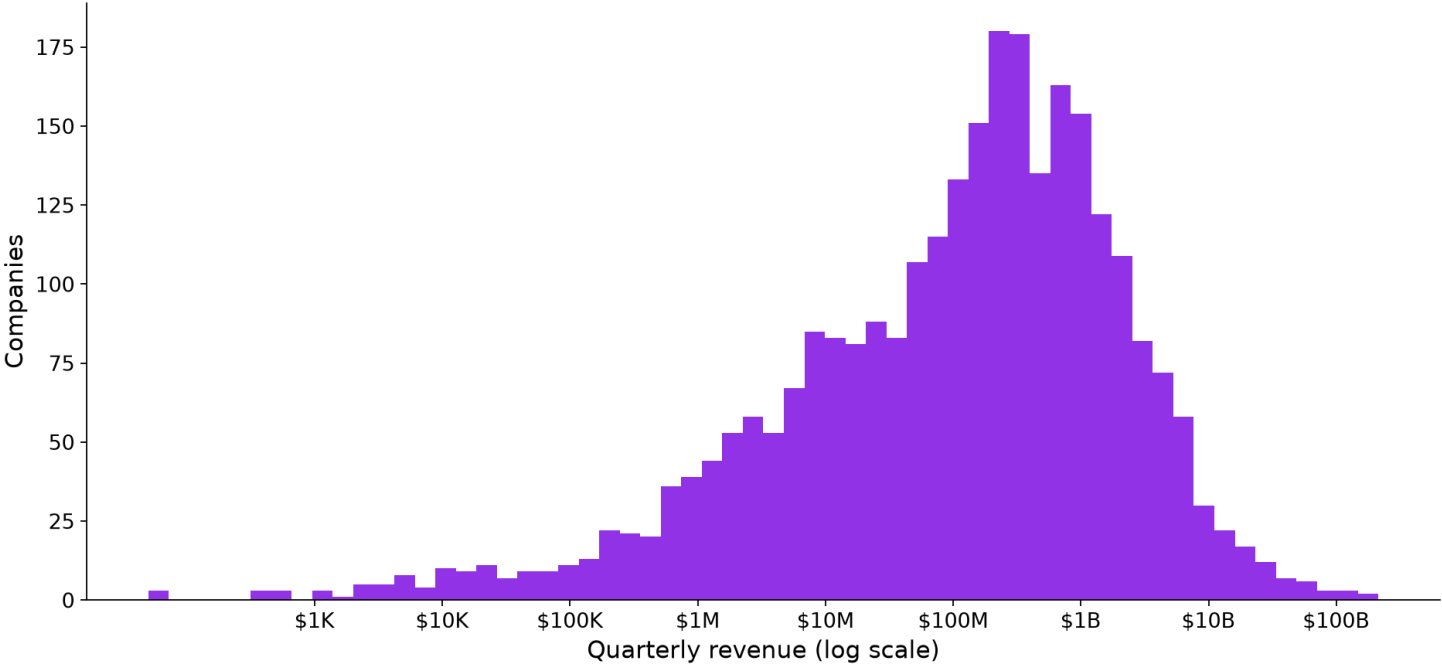

US listed companies: median revenue growth and share profitable, 2019Q1-2025Q4

Top 15 sectors by quarterly revenue, 2025Q4

Distribution of quarterly revenue across US listed companies, 2025Q4

Quarter-by-quarter aggregates (calendar quarters)

Sums over the companies that filed each quarter; the set of companies changes from quarter to quarter, so totals are not a like-for-like index. Growth is the median over companies with at least \$1M of revenue a year earlier.

Quarter	Companies	Rows with revenue	Total revenue	Total net income	Total operating income	Share profitable	Median revenue growth YoY	Median net margin

Fastest revenue growth, 2025Q4 (companies with \$100M+ quarterly revenue and \$25M+ a year earlier)

Year-on-year growth against the same fiscal quarter a year earlier. Acquisitions drive many of the largest jumps.

Results by sector, 2025Q4

Sector from the SIC code; sectors with fewer than five reporting companies are left out. Net margin is computed over companies that report both revenue and net income, and left blank when that revenue is under \$1B (banks and insurers often tag no revenue line).

Sector	Companies	Revenue	Net income	Operating income	Net margin	Share profitable	Median revenue growth	Largest by revenue

Companies reporting by listing venue and year

Distinct companies with at least one quarter ending in the year; the venue is known for companies matched to a ticker listing.

Listing venue	2019	2020	2021	2022	2023	2024	2025	2026 (H1)	Revenue 2025Q4	Share profitable 2025Q4
NASDAQ	1,305	1,398	1,640	1,723	1,767	1,823	1,894	1,492	\$1.4T	46.1%
NYSE	991	1,027	1,098	1,127	1,150	1,180	1,213	1,128	\$2.8T	74.0%
OTC	472	476	527	543	530	456	398	154	\$3.9B	32.0%
NYSE American	91	93	99	107	113	121	125	90	\$5.5B	32.2%

Companies by quarterly revenue band, 2025Q4

Quarterly revenue	Companies	Share of companies	Total revenue	Total net income	Share profitable	Median revenue growth	Median net margin
No revenue	86	3.0%	\$0	\$-629.8M	11.9%	-100.0%	
Under \$1M	244	8.4%	\$74.6M	\$-2.1B	15.5%	-55.6%	-428.5%
\$1M–10M	371	12.8%	\$1.6B	\$-7.2B	29.0%	+0.3%	-36.7%
\$10M–100M	576	19.9%	\$24.3B	\$-1.2B	44.2%	+5.1%	-2.9%
\$100M–1B	994	34.3%	\$387.1B	\$14.5B	67.7%	+6.5%	4.4%
\$1B–10B	546	18.9%	\$1.6T	\$128.3B	84.8%	+6.2%	7.2%
\$10B+	78	2.7%	\$2.6T	\$292.3B	91.8%	+7.5%	7.6%

Method

- Source.** Structured XBRL data from 10-Q and 10-K filings (and their amendments) filed with the US securities regulator, consolidated figures in US dollars only. Filers reporting in another currency are left out.
- Quarters.** Q1–Q3 are the three-month figures reported in each 10-Q (not the year-to-date). Q4 = the 10-K annual figure minus the nine-month year-to-date of the Q3 10-Q, used only when both start on the same date and the year ends 80–100 days after the nine months (`q4_derived` = True).

3. **One row per company-quarter.** When a quarter was filed more than once (amendments, restated comparatives), the latest filing wins. A quarter that appears under two fiscal-year labels is kept once (by period end).
4. **Sanity checks.** Values are blanked, not corrected, when: revenue is negative; a quarterly figure exceeds a ceiling (revenue \$250B, net or operating income $\pm$ \$100B); a figure is more than 300 $\times$ above or below the same company's median quarter (scale slips, for companies with at least four quarters and a median above \$1M); quarterly revenue exceeds six times total assets (unit errors); operating income exceeds twice revenue for a company with \$100M+ revenue; or a derived Q4 revenue is below a quarter or above four times the average of the same year's Q1–Q3 (the annual report was restated, for example for discontinued operations). Rows with no figure left are dropped, and periods ending after 30 June 2026 are excluded.
5. **Revenue fallback.** For filers that tag no revenue line, revenue = gross profit + cost of revenue when both are filed for the quarter.
6. **Not operating companies.** Exchange-traded funds, commodity, bitcoin and royalty trusts, and investment funds are dropped by name and SIC code (6189, 6221, 6722, 6726).
7. **Calendar quarter.** Bucketed from the period end minus 15 days, so a 52/53-week quarter ending on 4 October counts as Q3; each company has at most one row per calendar quarter.
8. **Growth.** `revenue_yoy_pct` compares with the same fiscal quarter of the prior fiscal year when the two period ends are 350–380 days apart and prior revenue is positive. Rankings and medians use only companies with at least \$1M of revenue a year earlier.
9. **Sector.** From the latest SIC code the company filed, grouped into readable sectors (with pharmaceuticals, biotech, software, semiconductors, REITs and blank-check companies split out).
10. **Website and venue.** A company gets a domain when Fliar's company index links its filings to a website directly, or through a unique US ticker whose company name matches. The listing venue comes from the same ticker match.
11. **Sample.** Each company key is ranked by `sha1(key)`. Keys are taken in rank order until the file holds $\max(25\%, 5,000)$ rows (capped at 100,000).
12. **Profile links.** Links are built from Fliar's company index and checked against it. A row whose company has no public profile has an empty link.

Columns

Column	Description
<code>cik</code>	public US securities-regulator company number (CIK)
<code>company_name</code>	registered company name as filed
<code>ticker</code>	stock ticker as filed (blank when not reported)
<code>exchange</code>	listing venue (NASDAQ, NYSE, NYSE American, OTC ...) where known
<code>company_domain</code>	company website domain when linked, else blank (the join key for the API)
<code>sic</code>	Standard Industrial Classification code
<code>sector</code>	sector label derived from the SIC code
<code>fiscal_year</code>	company's fiscal year
<code>fiscal_quarter</code>	fiscal quarter: Q1, Q2, Q3 or Q4
<code>period_end</code>	last day of the quarter (YYYY-MM-DD)
<code>calendar_quarter</code>	calendar quarter the period ends in (e.g. 2025Q3)
<code>revenue_usd</code>	revenue for the three months, US\$
<code>net_income_usd</code>	net income (negative = loss) for the three months, US\$
<code>operating_income_usd</code>	operating income (loss) for the three months, US\$

Column	Description
revenue_yoy_pct	revenue growth vs the same fiscal quarter a year earlier, %
net_income_yoy_pct	net income change vs the same quarter a year earlier, % of the prior-year absolute value
q4_derived	True when the Q4 figures are the annual report minus the nine-month year-to-date (Q4 is not filed separately)
fliar_profile_url	full company profile on Fliar (financials, funding, team, news)

Available only through the [Radar API](#): the full quarterly statements (cost of revenue, gross profit, R&D, SG&A, EPS, share counts, cash flow, balance sheet, debt); annual and year-to-date periods; filing links and accession numbers; quarters filed after this release and the monthly refresh; the rest of the companies (this file holds a fixed sample of companies); company profile, funding, team and contacts.

Limitations

- One storage shard of the source table was unavailable at release time, so some company-quarters are missing (a slight, roughly even undercount).
- Revenue is not tagged by every filer (banks and insurers often report other income lines), so revenue is blank for a share of rows; net income is the most complete line.
- Q4 is derived, so it absorbs any year-end adjustments and restatements of earlier quarters.
- Quarters ending in 2026 are partial: many companies had not filed their 2026 reports at release time.
- Fiscal years differ by company; use `calendar_quarter` to compare companies at the same point in time.
- The file includes small and shell companies quoted over the counter alongside large caps; filter by revenue for like-for-like analysis.
- Totals across companies are sums over whoever filed in that quarter, not a fixed index.
- Only part of the companies are linked to a website, so some `company_domain` and `fliar_profile_url` cells are empty.
