

VC & PE Fund Raises 2010–2026: findings, method and data card

Fliar Research · released October 2026 · licence CC BY-NC 4.0

How this dataset was acquired. Every row comes from the [Radar API](#), Fliar's company-data API and MCP server. Radar reads business news continuously and extracts each announcement of a new investment fund into structured fields: the manager, the fund name and type, the target and amount raised, the close date, the sector and geographic focus and any anchor investors. It then links the manager to its record in a database of five million companies. This release covers venture capital, private equity, infrastructure, real estate and private credit funds reported from January 2010 to June 2026. Repeat reports of the same fund are merged, and every amount is checked against the sentence it was read from. Each row names the article it was read from (`news_source` , `news_url`) and quotes the sentence (`news_excerpt`). A manager's full, continuously updated event timeline, including fund raises, is available through `POST /v1/companies/events` ([reference](#)) or the `get_company_events` MCP tool.

This file is a 25% sample: 5,591 of 22,361 fund raises. It keeps every record for a fixed subset of managers. The subset is chosen by a hash, so it stays the same from one release to the next. The findings and tables below were computed on the **full** data. For the rest, the withheld fields and monthly updates, [get a Radar API key \(docs\)](#). Each row's `fliar_profile_url` opens the company's full profile on Fliar.

Key findings

1. **22,361 fund raises by 9,965 managers, 2010 to June 2026.** 14,695 disclosed a raised amount, totalling \$9.3T.
2. **2022 was the busiest year** with 2,382 fund raises reported; 2025 had 1,932 (\$723.6B disclosed).
3. **Venture capital is the most common fund type** (12,578 funds), but private equity raised the most disclosed money (\$5.1T vs \$2.0T).
4. **Billion-dollar funds hold the money:** 1,865 funds of US\$1B or more are 13% of funds with an amount but 75% of disclosed dollars.
5. **Targets vs closes:** of 8,751 funds reporting both, the median raised 100% of target and 77% met or beat it.
6. **Geography:** the top three countries by disclosed fund size (United States, United Kingdom, India) account for 66% of disclosed dollars with a country.

Top 12 countries by number of fund raises

Fund raises by year and fund type

Full data; 2026 covers January to June. Other and unspecified types are in the total only.

Infrastructure	395	\$1.0B	\$800.0M	100.0%	62.5%	20.0%	13.4%
Real estate	303	\$500.0M	\$370.0M	100.0%	64.7%	14.2%	14.5%
Private credit	286	\$256.5M	\$240.0M	100.0%	73.4%	16.8%	10.8%
Unspecified	163	\$60.0M	\$50.0M	100.0%	69.3%	3.7%	14.7%
All types	8,751	\$162.0M	\$147.0M	100.0%	76.6%	10.4%	8.4%

Fund size distribution by type

Fund size	Venture capital	Private equity	Infrastructure	Real estate	Private credit	All funds	Share of disclosed \$
< \$10M	1,413	192	13	9	54	1,817	0.1%
\$10–50M	2,316	470	41	61	96	3,083	1.0%
\$50–100M	1,359	387	47	58	56	1,957	1.6%
\$100–250M	1,575	769	95	147	101	2,738	4.9%
\$250–500M	801	802	106	117	96	1,966	7.8%
\$500M–1B	426	683	142	99	67	1,431	11.2%
\$1–5B	227	744	189	91	82	1,347	31.3%
≥ \$5B	32	232	52	11	25	356	42.2%

Method

- Extraction.** Radar's pipeline reads each article about a new fund and extracts structured fields, including the source sentence.
- Scope.** Venture capital, private equity, infrastructure (including energy), real estate, private credit and fund-of-funds vehicles. Mutual funds, hedge funds and ETFs are dropped, as are rows with no fund type unless the name says "fund", and rows that describe a company's own funding round.
- Manager.** The manager name comes from Fliar's company database when its website is known. Names that read as individuals are blanked, and social-profile links are removed from the domain field.
- Deduplication.** Reports are merged per manager (name variants such as "Blackstone Group" and "The Blackstone Group" count as one). The same numbered fund name (roman and ordinal numbers normalised, "Fund IX" = "Ninth Fund") is one fund at any distance in time. Otherwise, within 540 days of a fund's first report, reports merge when the fund name matches,

when the amount matches within 3%, or when one report is unnamed and close in time (45 days). A US\$1B+ amount re-reported by the same manager or under the same fund name (within 1%, 540 days) is the same fund. Otherwise funds with different numbers never merge. The largest checked close is kept.

5. **Amount check.** Each amount is compared with the money figures parsed from its source sentence (tolerance 0.6–1.7×), allowing for amounts stored in millions. `verified` matched; `unchecked` had no parseable figure; `failed_check` is blank because it did not match, was a bare number under 10,000, was over US\$5B without a match, or was over US\$20B (US\$30B) without two (three) or more reports and a known manager website; `not_disclosed` had no amount.
6. **Currency.** US dollars, from the stored conversion or at fixed approximate rates.
7. **Bulk back-fills.** Days carrying more than five times the usual number of reports (archive back-fills stamped with an ingest date rather than the publication date) are dropped.
8. **Dates.** The date is the earliest report's publication date; rows before 2010 or after June 2026 are dropped.
9. **Sample.** Each manager key is ranked by `sha1(key)`. Keys are taken in rank order until the file holds max(25%, 5,000) rows (capped at 100,000).
10. **Profile links.** Links are built from Fliar's company index and checked against it. A row whose company has no public profile has an empty link.

Columns

Column	Description
<code>fund_id</code>	stable 12-character ID of the fund raise
<code>announced_date</code>	date of the earliest report (YYYY-MM-DD)
<code>year</code>	announcement year
<code>fund_manager</code>	firm managing the fund (organisations only; blank when the report named only individuals)
<code>fund_manager_domain</code>	manager's website domain (the join key for the API)
<code>fund_name</code>	fund name as reported
<code>fund_type</code>	Venture capital / Private equity / Infrastructure / Real estate / Private credit / Fund of funds / Unspecified
<code>country</code>	country of the manager or fund
<code>sector_focus</code>	stated sector focus (as reported)
<code>focus_group</code>	sector focus grouped into about 15 themes
<code>geography_focus</code>	stated geographic focus (as reported)
<code>target_amount_usd</code>	target fund size in US\$ (blank when not reported or it failed the check)
<code>raised_amount_usd</code>	amount raised or closed in US\$ (latest and largest close reported; blank when not reported or it failed the check)
<code>amount_status</code>	<code>verified</code> / <code>unchecked</code> / <code>failed_check</code> / <code>not_disclosed</code> (for <code>raised_amount_usd</code>)
<code>close_date</code>	reported close date, where given
<code>anchor_count</code>	number of anchor investors or LPs named (the names are in the API)
<code>fund_strategy</code>	short strategy statement (blank when longer than 200 characters)
<code>news_mentions</code>	articles that reported the fund
<code>news_source</code>	publisher of the article (website domain)
<code>news_url</code>	link to the article
<code>news_excerpt</code>	the sentence the fund raise was extracted from (up to 300 characters)
<code>fliar_profile_url</code>	full company profile on Fliar (financials, funding, team, news)

Available only through the [Radar API](#): names and websites of anchor investors and LPs; long fund strategy statements; every article that reported the fund; funds reported after June 2026 and the monthly refresh; the rest of the managers; manager profile, portfolio, team and contacts.

Limitations

- Derived from news: funds that were never reported are missing, and coverage favours large, English-reported funds.
- The date is the article date. An article can describe a fund closed earlier.
- A raised amount can be an interim close rather than the final size.
- Fund types and focus are as reported and classified; the focus grouping is keyword-based.
- Individuals named as managers are blanked, so some rows have no manager.
- `news_source` and `news_url` are blank when the article could not be retrieved at release time.
